

1. Record Nr.	UNINA9910814856203321
Autore	Albala-Bertrand J. M.
Titolo	Disasters and the networked economy // J.M. Albala-Bertrand
Pubbl/distr/stampa	Abingdon, Oxon : , : Routledge, , 2013
ISBN	0-203-40667-2 1-135-95338-4
Descrizione fisica	1 online resource (213 p.)
Collana	Routledge Studies in Development Economics ; ; 103
Disciplina	363.34
Soggetti	Disasters - Economic aspects Economic policy Social accounting Macroeconomics - Econometric models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title Information; Title Page; Copyright Page; Table of Contents; List of illustrations; Preface; List of acronyms; Introduction; 1 The problem with quantitative studies; Introduction; Three failures of quantitative studies; Conclusion; 2 A political economy framework: functionality, localization and networks; Introduction; Functionality; An analytical framework; Societal networking; Isolation and insulation; Conclusion; 3 Networked reactions and public policy; Introduction; Endogenous and exogenous response balance; Inbuilt networked reactions Market consistency and some response mechanisms Systemic public policy and institutional networks; Conclusion; 4 The networked macroeconomy and disasters; Introduction; Disaster escalation and catastrophe; An aggregate macroeconomic argument; A disaggregated macroeconomic argument; The analysis of networking and localization; Conclusion; 5 Regional disaggregation and two examples; Introduction; Interregional connections and switching; The use of IRIO, IO and national accounts; Two cases: Indonesia 2004 and Chile 2010; Conclusion; 6 Systemic consistency, business and network shifting Introduction Systemic consistency; Business and networks; What response policies can be appropriate; Conclusion; 7 Conclusions;

Appendix; Suggested surveys of networks after disasters; At country level; At international level; Notes; References; Index

Sommario/riassunto

Mainstream quantitative analysis and simulations are fraught with difficulties and are intrinsically unable to deal appropriately with long-term macroeconomic effects of disasters. In this new book, J.M. Albala-Bertrand develops the themes introduced in his past book, *The Political Economy of Large Natural Disasters* (Clarendon Press, 1993), to show that societal networking and disaster localization constitute part of an essential framework to understand disaster effects and responses. The author's last book argued that disasters were a problem of development, rather than
