Hoit, Gary Weismer, Brad Story Pubbl/distr/stampa San Diego, California:,: Plural Publishing,, [2022] ©2022 **ISBN** 1-63550-307-8 Edizione [Second edition.] Descrizione fisica 1 online resource (369 pages) Disciplina 612.78 Speech - Physiological aspects Soggetti Speech perception Speech disorders Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia "This comprehensive textbook for undergraduate-level anatomy and Sommario/riassunto physiology courses in communication sciences and disorders programs is neither oversimplified nor excessively detailed. The book is written with clinical endpoints in mind, and only those topics that are ultimately important to understanding, evaluating, and managing clients with speech, hearing, and swallowing disorders are covered. Drawing on material from the best-selling Preclinical Speech Science: Anatomy, Physiology, Acoustics, and Perception, Third Edition textbook (Hixon, Weismer, & Hoit, 2020), the authors have provided chapters that cover basic concepts in anatomy and physiology, each of the speech subsystems (respiratory, laryngeal, velopharyngeal-nasal, and pharyngeal oral), the auditory system, swallowing physiology, and neural structures and mechanisms that support speech/language.

hearing, and swallowing. The text was carefully crafted to meet the needs of entry-level university students and the figures were designed to feature the key elements of the concepts discussed in the text"--
