

1. Record Nr.	UNINA9910815033203321
Autore	Rida Amin
Titolo	RFID-enabled sensor design and applications // Amin Rida, Li Yang, Manos Tentzeris
Pubbl/distr/stampa	Boston, : Artech House, c2010
ISBN	1-60783-982-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (212 p.)
Collana	Artech House integrated microsystems series
Altri autori (Persone)	YangLi, Ph. D. TentzerisManos M
Disciplina	621.384
Soggetti	Radio frequency identification systems Radio - Equipment and supplies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	RFID-Enabled Sensor Design and Applications; Contents; Preface; Chapter 1 Automatic Identification Systems; Chapter 2 Fundamentals and Operating Principles for RFID; Chapter 3 Fundamentals and Operating Principles of Sensors; Chapter 4 Design of RFID-Enabled Sensors; Chapter 5 State-of-the-Art Technology for RFID/Sensors; Chapter 6 Worldwide Applications; About the Authors; Index.
Sommario/riassunto	RFID (radio-frequency identification) is an emerging communication system technology and one of the most rapidly growing segments of today's automatic identification data collection industry. This cutting-edge resource offers you a solid understanding of the basic technical principles and applications of RFID-enabled sensor systems. The book provides you with a detailed description of RFID and it's operation, along with a fundamental overview of sensors and wireless sensor networks. Moreover, this practical reference gives you step-by-step guidance on how to design RFID-enabled sensors that fo.
