Sommario/riassunto	The Schumpeterian process of "creative destruction" is an essential ingredient of a dynamic economy. In many countries around the world, however, this process is weakened by pervasive regulation of product and factor markets. This book documents the regulatory obstacles faced by firms, particularly in developing countries, and assesses their

implications for firm renewal and macroeconomic performance. Combining a variety of methodological approaches -- analytical and empirical, micro and macroeconomic, single- and cross-country --, the book provides evidence that streamlining the regulatory fra
