## Sommario/riassunto

Pregnancy complicated by neurological disorders is a challenging area for both obstetricians and neurologists. Treatment of the maternal condition often needs to be adjusted because of concerns for the fetus, and some conditions have a major impact on the method, mode, and timing of delivery. Many of the clinical problems that arise in pregnant women with a neurological disease have not been the subject of clinical trials, so management must often be based on what published evidence is available and a good understanding of the likely interactions between the condition and pregnancy and vice
