

1. Record Nr.	UNINA9910815098703321
Titolo	Green chemistry for environmental remediation // edited by Rashmi Sanghi and Vandana Singh
Pubbl/distr/stampa	Salem, Mass., : Scrivener Pub. Hoboken, N.J., : Co-published by John Wiley & Sons, c2012
ISBN	1-283-43244-7 9786613432445 1-118-28772-X 1-118-28770-3 1-118-28768-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (802 p.)
Altri autori (Persone)	SanghiRashmi SinghVandana <1961->
Disciplina	577/.14
Soggetti	Environmental chemistry - Industrial applications Sustainable development Environmental protection
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Green chemistry and societal sustainability -- pt. 2. Green lab technologies -- pt. 3. Green bio-energy sources -- pt. 4. Green solutions for remediation.
Sommario/riassunto	The book presents an in depth review from eminent industry practitioners and researchers of the emerging green face of multidimensional environmental chemistry. Topics such as green chemistry in industry, green energy: solar photons to fuels, green nanotechnology and sustainability, and green chemistry modeling address a wide array of issues encouraging the use of economical ecofriendly benign technologies, which not only improve the yield, but also illustrates the concept of zero waste, a subject of interest to both chemists and environmentalists alike.
