Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Educating physicians: context and challenges -- Being a doctor: foundations of professional education -- The student's experience: undergraduate medical education -- The resident's experience: graduate medical education -- Regulating and financing medical education -- Leadership for organizational change -- Realizing the vision: transforming medical education -- Supporting excellence through effective policy. "Emerging from a study of physician education by the Carnegie Sommario/riassunto Foundation for the Advancement of Teaching, Educating Physicians calls for a major overhaul of the present approach to preparing doctors for their careers. The text addresses key issues for the future of the field and takes a comprehensive look at the most pressing concerns in physician education today. Like the Carnegie Foundation's revolutionizing Flexner Report of 1910, Educating Physicians is destined to change the way administrators and faculty in medical

schools and programs prepare their physicians for the future"--
