Sommario/riassunto	Guided Care is an exciting new model used to provide medical and nursing care to clients with chronic conditions. This model works by (1) providing the services of a Guided Care Nurse, as the point of service, within a primary care physician's office, or within a pool of primary care physician's offices, and (2) providing for the certification of the Guided Care nurse. This book provides physicians, nurses, administrators, and leaders of health care organizations with practical, step-by-step guidance for adopting Guided Care Nursing to transform typical primary care practices into "medical home
