

1. Record Nr.	UNINA9910815145603321
Autore	Weisz George
Titolo	Divide and conquer [[electronic resource]] : a comparative history of medical specialization // George Weisz
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2006
ISBN	0-19-770638-X 1-280-42847-3 0-19-974910-8 1-60256-549-X
Descrizione fisica	1 online resource (xxx, 359 pages)
Disciplina	610/.9
Soggetti	Medicine - Specialties and specialists - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	The rise of specialties in early nineteenth-century Paris -- Specialization and its opponents in London -- Specialization in the German-speaking world -- The rise of American specialties -- Regulating specialists in national medical directories -- Regulating specialists in Germany -- Regulating specialists the American way -- The French style of regulating specialists -- Regulating specialists in the British manner -- From divisions of medicine to specialties -- Separating, combining and competing.
Sommario/riassunto	This wide-ranging book is the first to examine one of the most significant and characteristic features of modern medicine - specialization - in historical and comparative context. Based on research in three languages, it traces the origins of modern medical specialization to 1830's Paris and examines its spread to Germany, Britain, and the US, showing how it evolved from an outgrowth of academic teaching and research in the 19th century into the dominant mode of medical practice by the middle of the 20th. Taking account of the parallels and differences in national developments, the book shows the international links among the nations' medical systems as well as the independent influences of local political and social conditions in the move toward specialization. An epilogue takes the story up to the

twenty-first century, where problems of specialization merge into the larger crisis of health care which affects most western nations today.
