Sommario/riassunto	In November 2005 Tilburg University hosted for the first time an international Colloquium on the European and National Perspectives of

the Regulation of Gambling . The results of this exciting day are reflected in this book which brings together a wide range of perspectives from the contemporary debate surrounding the regulation of gambling markets within the context of the European Union. Not only does the book encompass both ends of the spectrum of the current discussion; it also brings together the perspectives of academics, lawyers and operators. The debate on the regulation of gambling has been gathering pace following a series of judgments of the ECJ. In 2006 gambling was excluded from the proposed Services Directive, and the European Commission commenced infringement proceedings against a handful of Member States regarding restrictions on the supply of sports betting services. Given these developments and being one of the very few publications concerned with this topic, this book will serve as a timely and valuable contribution for all those interested in this emerging and at times decisive debate.
