

1. Record Nr.	UNINA9910815194003321
Titolo	Electroanalytical chemistry research trends [[electronic resource] /] / Kenta Hayashi, editor
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2009
ISBN	1-60876-740-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (311 p.)
Classificazione	VG 8000
Altri autori (Persone)	HayashiKenta
Disciplina	543/.4
Soggetti	Electrochemical analysis - Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Critical evaluation of electrochemistry in ionic liquids / Angels A.J. Torriero and Alan M. Bond -- Applications of the maximum likelihood technique to certain electrochemical observations / Thomas Z. Fahidy -- Electrochemical synthesis, charge transport and multi-electron transfer control for a new semiconductor nanocomposite film with a functional molecule / Koji Sone, Msasyuki Yagi -- Porous silicon formation by metal particle enhanced HF etching / Shinji Yae, Naoki Fukumuro and Hitoshi Matsuda -- Detection of active oxygen species in TiO photocatalysis / Yoshio Nosaka -- Nonparametric anova-based diagnostics of electrochemical/electroanalytical measurements: an introduction / Thomas Z. Fahidy -- Boron trifluoride diethyl etherate and its mixed electrolytes: application to the electrochemical syntheses of inherently conducting polymers / Jingkun Xu ... [et al.] -- The mutual relation of decisive characteristics of electrolytic copper powder and effect of deposition conditions on them / Nebojsa D. Nikolic ... [et al.] -- Significant influence of the spherical voids in nanocrystalline TiO films on the light scattering and mass transport behaviors / Yuan Lin ... [et al.] -- Electroanalysis of organohalides / Mithran Somasundrum and Werasak Surareungchai -- The application of multi-phenyl-naphthyl-amine-based hole-transporting materials in electrochromic devices / Chien-Hsin Yang and Liang-Ren Huang -- Solvent effect on the adsorption of bromide ions on the Cd(0001) single crystal plane / M Vaartno, K. Lust and E. Lust.
