## Sommario/riassunto

The China Society Yearbook, Volume 5 continues the ten-year tradition of presenting precise and venerable academic principles by compiling the findings of the Chinese Academy of Social Sciences' subject research group for the "Analysis and Forecast of the Social Situation". The focus of the research group centered around three themes for 2009-2010. First, the steps China is taking to lead the country away from the shadow of the financial crisis and begin a new stage of growth. The second focus was how to organize this new growth stage. China's development relies on upgrading the industrial structures, transforming the social and economic structures, and stimulating domestic consumption demand. Finally, the group addressed China's policy of an overall restructuring that focuses on major societal issues such as employment, division of income, education, health and medical systems, social security, the urban-rural administration system, public institution administration, and the community and social organizational reform. Written by contributors from professional research and survey organizations, universities, and related governmental sections, The China Society Yearbook, Volume 5 provides an excellent resource for those interested in current societal changes in China.

Sommario/riassunto

"This book investigates phenomena at the grammar-discourse interface with a strong focus on discourse markers, whose development and concrete uses in a given language tend to be based on a close interplay of grammatical and discourse-related forces. The topics range from the transition of linguistic signs "out of" sentence grammar and "into" the domain of discourse to differences between more grammatical vs. more discourse-pragmatic expressions in terms of structural behavior and cognitive processing, and the different, intricate ways in which the usage conditions and meanings of grammatical constituents or structural units are affected by the discourse context in which they are used. The twelve studies in this book are based on fresh empirical data from languages such as English, Basque, Korean, Japanese and French and involve the study of linguistic expressions and structures such as pragmatic markers and particles, comment clauses, expletives, adverbial connectors, and expressives"-- Provided by publisher.
