Autore	Picou J. Steven
Titolo	Caught in the path of Katrina : a survey of the hurricane's human effects // J. Steven Picou and Keith Nicholls ; foreword by Lee Clarke
Pubbl/distr/stampa	Austin, Texas : , : University of Texas Press, , [2019] ©2019
ISBN	1-4773-1974-3
Descrizione fisica	1 online resource (130 pages)
Collana	The Katrina bookshelf
Disciplina	976.044
Soggetti	Hurricane Katrina, 2005 - Social aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Frontmatter -- CONTENTS -- FOREWORD -- ACKNOWLEDGMENTS -- 1. Introduction -- 2. Experiencing Katrina -- 3. The Long Road Home -- 4. Emerging Obstacles to Rebuilding -- 5. Physical Health Effects -- 6. Mental Health Effects -- 7. Summing Up and Lessons Learned -- Appendix 1. The Saffir-Simpson Hurricane Wind Scale -- Appendix 2. Survey Methodology -- NOTES -- INDEX
Sommario/riassunto	In 2008, three years after Hurricane Katrina cut a deadly path along the northern coast of the Gulf of Mexico, researchers J. Steven Picou and Keith Nicholls conducted a survey of the survivors in Louisiana and Mississippi, receiving more than twenty-five hundred responses, and followed up two years later with more than five hundred of the initial respondents. Showcasing these landmark findings, <i>Caught in the Path of Katrina: A Survey of the Hurricane's Human Effects</i> yields a more complete understanding of the traumas endured as a result of the Storm of the Century. The authors report on evacuation behaviors, separations from family, damage to homes, and physical and psychological conditions among residents of seven of the parishes and counties that bore the brunt of Katrina. The findings underscore the frequently disproportionate suffering of African Americans and the agonizingly slow pace of recovery. Highlighting the lessons learned, the book offers suggestions for improved governmental emergency management techniques to increase preparedness, better mitigate storm damage, and reduce the level of trauma in future disasters.

Multiple major hurricanes have unleashed their destruction in the years since Katrina, making this a crucial study whose importance only continues to grow.
