Sommario/riassunto	In Protecting Stateless Persons: The Implementation of the Convention Relating to the Status of Stateless Persons across EU States , Katia

Bianchini offers an in-depth comparative study of legislation, case-law and decision-making concerning the treatment of stateless persons in ten EU States. Focusing on whether and why statelessness determination procedures are needed, what their constituent elements should be, how the definition of 'stateless person' is interpreted and applied, and what rights are attached to the granting of status, Katia Bianchini critically examines current national legal frameworks, and points a way forward for more effective legislation and practice in the area of statelessness. Against this backdrop, she adds insights into the wider debate on how human rights treaties should be implemented.
