Pubbl/distr/stampa	Leiden, The Netherlands : , : Koninklijke Brill, , 2015 ©2015
ISBN	90-04-29375-2
Descrizione fisica	1 online resource (648 p.)
Collana	Legal History Library, , 1874-1793 ; ; Volume 17 Studies in the History of International Law ; ; Volume 7
Disciplina	341.3/709409033
Soggetti	International law - Europe - History - 18th century Balance of power - Europe - History - 18th century Europe Foreign relations 18th century Great Britain Foreign relations 18th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preliminary Material -- Introduction -- The System of Stanhope and Dubois (1717–1723) -- Stanhope and Dubois's Diplomatic Legacy -- Jealousy and Misunderstandings? The Disintegration of the European System (1731–1740) -- Conclusion -- Chronology -- Simplified Genealogies -- Sources -- Bibliography -- Index.
Sommario/riassunto	Balance of Power and Norm Hierarchy: Franco-British Diplomacy after the Peace of Utrecht offers a detailed study of French and British diplomacy in the age of 'Walpole and Fleury'. After Louis XIV's decease, European international relations were dominated by the collaboration between James Stanhope and Guillaume Dubois. Their alliance focused on the amendment and enlargement of the peace treaties of Utrecht, Rastatt and Baden. In-depth analysis of vast archival material uncovers the practical legal arguments used between Hampton Court and Versailles. 'Balance of Power' or 'Tranquillity of Europe' were in fact metaphors for the predominance of treaty law even over the most fundamental municipal norms. An implacable logic of norm hierarchy allowed to consolidate peace in Europe.

## Sommario/riassunto

The fourth edition of this textbook has been thoroughly revised in order to reflect the central role which geodesy has achieved in the past ten years. The Global Geodetic Observing System established by the IAG utilizes a variety of techniques to determine the geometric shape of the earth and its kinematics, the variations of earth rotation, and the earth's gravity field. Space techniques play a fundamental role, with recent space missions also including gravity field recovery. Terrestrial techniques are important for regional and local applications, and for validating the results of the space missions. Global and regional reference systems are now well established and widely used. They also serve as a basis for geo-information systems. The analysis of the time variation of the geodetic products provides the link to other geosciences and contributes to proper modelling of geodynamic processes. The book follows the principal directions of geodesy, providing the theoretical background as well as the principles of measurement and evaluation methods. Selected examples of instruments illustrate the geodetic work. An extensive reference list supports further studies. The book is intended to serve as an introductory textbook for graduate students as well as a reference for scientists and engineers in the fields of geodesy, geophysics, surveying engineering and geomatics.

Nota di contenuto	Chapter 1: Introduction -- Chapter 2: The State and transnationalism -- Chapter 3: The Transnational Emigration State -- Chapter 4: The Transnational Immigration State and the totalitarian temptation -- Chapter 5: The revolt of ecotones.
Sommario/riassunto	This work in two parts examines the relations between transnational societies and states. The second volume of this work contends that current policies meant to control or enhance transnational flows have led to the emergence of a transnational policy apparatus coined the transnational state. This book proposes an innovative conceptual framework to grasp the transformations of the contemporary state in both sending and receiving countries. It shows how states expand beyond national territorial limits by reaching out to migrants where they are. In response to the migrants' endeavours to circumvent the constraints imposed by selective migration policies, public authorities expand the reach of their control beyond (externalisation), within (internalisation) and at (expansion) borders. A totalitarian temptation

seems to have seized contemporary state bureaucracies, affecting the very nature of borders and societies. The core argument of this research is that the development of the transnational state is not random. It is a process shaping and shaped by the structures of the transnational society. Thomas Lacroix is a geographer, CNRS director of research at the Centre for International Research of Sciences Po Paris and a fellow of the Institute Convergence Migrations.
