Beyond the crisis : trends and challenges -- Towards "open skies" -- Beyond "open skies" -- Alliances : a response to uncertainty or an economic necessity? -- Labour is the key -- The "low-cost" revolution -- E-commerce@airlines.co -- State-owned airlines : a dying breed or a suitable case for treatment? -- Strategies for survival in the 21st century.
Sommario/riassunto	The airline industry is currently faced with its longest and deepest crisis to date: many airlines are losing hundred of millions of US dollars, several have collapsed entirely and others have been rescued by their governments. This crisis has been precipitated by external shocks such as the attack on the Twin Towers in New York, the invasion of Iraq and the SARS epidemic. In addition, the effect of these events has been

exacerbated by dynamic and potentially destabilizing internal developments. Comprehensive and thorough, this revealing book gives a detailed analysis of the c

Sommario/riassunto	The mass violence of the twentieth century's two world wars—followed more recently by decentralized and privatized warfare, manifested in terrorism, ethnic cleansing, and other localized forms of killing—has led to a heightened awareness of human beings' vulnerability and the precarious nature of the institutions they create to protect themselves from violence and exploitation. This vulnerability, something humans share amid the diversity of cultural beliefs and values that mark their differences, provides solid ground on which to construct a framework of human rights. Bryan Turner undertakes this task here, developing a sociology of rights from a sociology of the human body. His blending

of empirical research with normative analysis constitutes an important step forward for the discipline of sociology. Like anthropology, sociology has traditionally eschewed the study of justice as beyond the limits of a discipline that pays homage to cultural relativism and the “value neutrality” of positivistic science. Turner’s expanded approach accordingly involves a truly interdisciplinary dialogue with the literature of economics, law, medicine, philosophy, political science, and religion.
