

1. Record Nr.	UNINA9910815306203321
Titolo	Recent advances in stochastic operations research // editors, Tadashi Dohi, Shunji Osaki, Katsushige Sawaki
Pubbl/distr/stampa	Singapore ; ; Hackensack, NJ, : World Scientific, c2007
ISBN	1-281-12084-7 9786611120849 981-270-668-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (325 p.)
Altri autori (Persone)	DohiTadashi OsakiShunji SawakiKatsushige
Disciplina	519.2
Soggetti	Stochastic models Operations research - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"The International Workshop on Recent Advances in Stochastic Operations Research (2005 RASOR Canmore) was held in Canmore, Alberta, Canada, on August 25-26, 2005."--P. v.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface; List of Contributors; CONTENTS; Part A Reliability; Warranty Analysis: Estimation of the Degree of Imperfect Repair via a Bayesian Approach S. Chukova, Y. Hayakawa and R. Arnold; Design of Optimum Simple Step-Stress Accelerated Life Testing Plans E. A . Elsayed and H. Zhang; A BDD-Based Algorithm for Computing the K-Terminal Network Reliability G. Hardy, C. Lucet and N. Limnios; Reliability Evaluation of a Packet-Level FEC based on a Convolutional Code Considering Generator Matrix Density T. Hino, M. Arai, S. Fukumoto and K. Iwasaki A Framework for Discrete Software Reliability Modeling with Program Size and Its Applications S. Inoue and S. YamadaPart B Maintenance; Discrete-Time Opportunistic Replacement Policies and Their Application T. Dohi, N. Kaio and S. Osaka; Reliability Consideration of Window Flow Control Scheme for a Communication System with Explicit Congestion Notification M. Kimura, M. Imaizumi and K. Yasui; Optimal Availability Models of a Phased Array Radar T. Nakagawa and K. It0; Optimal Checking Time of Backup Operation for a Database System K.

Naruse, S. Nakagawa and Y. Okuda
Estimating Age Replacement Policies from Small Sample Data K.
Rinsaka and T. DohiPart C Finance; Stock Repurchase Policy with
Transaction Costs under Jump Risks H. Goko, M. Ohnishi and M.
Tsujiimura; The Pricing of Perpetual Game Put Options and Optimal
Boundaries A . Suzuki and K. Sawaki; On the Valuation and Optimal
Boundaries of Convertible Bonds with Call Notice Periods K. Yagi and K.
Sawaki; Part D Performance Evaluation; An Efficient Approach to
Analyze Finite Buffer Queues with Generalized Pareto Interarrival Times
and Exponential Service F. Ferreira and A . Pacheco
An Optimal Policy to Minimize Delay Costs Due to Waiting Time in a
Queue J. Koyanagi and H. KawaiOptimal Certificate Update Interval
Considering Communication Costs in PKI S. Nakamura, M. Arafuka and
T. Nakagawa; Bursts and Gaps of Markov Renewal Arrival Processes A .
Pacheco and H. Ribeiro; Part E Management Science; Nash Equilibrium
for Three Retailers in an Inventory Model with a Fixed Demand Rate H.
Hohjo and Y. Teraoka; A Sequential Expenditure Problem for Public
Sector Based on the Outcome T. Nakai
Calculating the Probabilities of Winning the Asian Qualifiers for 2006
FIFA World Cup M. Suzaki, S. Osaki and N. HirotsuIndex

Sommario/riassunto

Operations research uses quantitative models to analyze and predict the behavior of systems and to provide information for decision makers. Two key concepts in operations research are optimization and uncertainty. This volume consists of a collection of peer reviewed papers from the International Workshop on Recent Advances in Stochastic Operations Research (RASOR 2005), August 25-26, 2005, Canmore, Alberta, Canada. In particular, the book focusses on models in stochastic operations research, including queueing models, inventory models, financial engineering models, reliability models, and sim
