policy and industrial knowledge formation7. Regional policy as change management: Theoretical discussion and empirical illustrations; 8. Constructing an innovation policy agency: The case of the Swedish Governmental Agency for Innovation Systems; 9. Policy scripts and practice; 10. Can regional innovation systems be "constructed"?; 11. Gender in governance of regional innovation: Why gender matters and is mainstreamed in the Swedish case; 12. Entrepreneurship and public policy in emerging clusters
13. The "start-up factor": Regional innovation policy convergence between the US and Sweden14. Lessons on regional innovation governance in open economies; Index

Sommario/riassunto

In an increasingly globalised world, paradoxically regional innovation clusters have moved to the forefront of attention as a strategy for economic and social development. Transcending international success cases, like Silicon Valley and Route 128, as sources of lessons, successful high tech clusters in niche areas have had a significant impact on peripheral regions. Are these successful innovation clusters born or made? If they are subject to planning and direction, what is the shape that it takes: top down, bottom up or lateral?
