Identifying events: positivism; How? Explaining systems: paradigms; Why? Understanding processes: praxis; Intellectual panorama, ideological vision, and political view; Epilogue: what do we know about the world?; References; Index

Sommario/riassunto

As we approach the end of the second millennium, we find ourselves in times of radical social change. Orthodox explanations of the economy, the environment and the development process are unable to provide coherent policies for such issues as employment creation, environmental degradation and social progress. Economy-Environment-Development-Knowledge provides alternative perspectives on these fundamental aspects of human existence. Economists, environmentalists, and development theorists have so far been unable to agree on the most successful prescriptions to address problems. T
