

1. Record Nr.	UNINA9910815372703321
Titolo	Representation theory and mathematical physics : conference in honor of Gregg Zuckerman's 60th birthday, October 24-27, 2009, Yale University / / Jeffrey Adams, Bong Lian, Siddhartha Sahi, editors
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [2011] ©2011
ISBN	0-8218-8236-8
Descrizione fisica	1 online resource (404 p.)
Collana	Contemporary mathematics, ; 557 , 0271-4132
Classificazione	22E4522E4622E4717B6517B6817B6933D52
Disciplina	515/.7223
Soggetti	Linear algebraic groups Representations of Lie groups Mathematical physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents -- Preface -- Expository Papers -- The Plancherel Formula, the Plancherel Theorem, and the Fourier Transform of Orbital Integrals -- Branching Problems of Zuckerman Derived Functor Modules -- Chiral Equivariant Cohomology of Spheres -- 1. Introduction -- 2. Homotopy invariance -- 3. Conformal and quasi-conformal structures -- 4. Chiral equivariant cohomology of homogeneous spaces -- 5. Finite-dimensionality of $H^*(G(M))$ for compact $M$ -- 6. Chiral equivariant cohomology of spheres -- 7. The chiral point algebra -- Research Papers -- Computing Global Characters -- Stable Combinations of Special Unipotent Representations -- Levi Components of Parabolic Subalgebras of Finitary Lie Algebras -- On Extending the Langlands-Shahidi Method to Arithmetic Quotients of Loop Groups -- The Measurement of Quantum Entanglement and Enumeration of Graph Coverings -- The Dual Pair $(O(p,q), OSp(2,2))$ and Zuckerman Translation -- On the Algebraic Set of Singular Elements in a Complex Simple Lie Algebra -- An Explicit Embedding of Gravity and the Standard Model in $E_8$ -- From Groups to Symmetric Spaces -- 1. Notation -- 2. Almost diagonal symmetric spaces -- 3. A generalization of Schur's lemma -- 4. Elliptic curves arising from a symmetric space -- 5. Dimension of a nilpotent orbit -- 6. Some

intersection cohomology sheaves -- 7. Generalization of a theorem of Steinberg -- 8. F-thin, F-thick nilpotent orbits -- 9. F-thin nilpotent orbits and affine canonical bases -- 10. Character sheaves on p -- 11. Computation of a Fourier transform -- 12. Another computation of a Fourier transform -- 13. Computation of a Deligne-Fourier transform.
