Sommario/riassunto	"Studies on Feminity is the second volume in a unique series edited by Alcira Mariam Alizade for the Committee on Women and Psychoanalysis of the International Psychoanalytical Association. Providing a forum for

exploration and discussion of diverse issues relating to gender constructs, sexuality, and sexual identity, the series brings together an internationally renowned group of contributors trained in the psychoanalytic tradition. *Studies on Femininity* discusses gender roles, femininity and motherhood. The various stages in a woman's life (adolescence, adulthood and menopause) are all examined. 'In this volume, the reader will find not only papers from different essentialist, constructivist and culture-based standpoints, but will also note the existence of theoretical and clinical intersections where psychoanalysis borders on closely-related disciplines.' - Alcira Mariam Alizade, from the Foreword"--Provided by publisher.
