Radio Frequency Spectrum Management and Time Frequency Standards; Chapter 2. International Telephony Recommendations; Chapter 3. Units, Constants, and Conversion Factors; Chapter 4. Properties of Materials; Chapter 5. Components or Parts; Chapter 6. Fundamentals of Networks; Chapter 7. Fourier Waveform Analysis; Chapter 8. Filters, Simple Bandpass Design; Chapter 9. Filters, Modem-Network-Theory Design; Chapter 10. Active Filter Design; Chapter 11. Attenuators<br>Chapter 12. Measurements and AnalysisChapter 13. Magnetic-Core Transformers and Reactors; Chapter 14. Power Electronics-Rectifiers, Filters, and Power Supplies; Chapter 15. Feedback Control Systems; Chapter 16. Electron Tubes; Chapter 17. Power Grid-Tube Circuits; Chapter 18. Semiconductors and Transistors; Chapter 19. Transistor Circuits; Chapter 20. Integrated Circuits; Chapter 21. Optoelectronics; Chapter 22. Optical Communications; Chapter 23. Analog Communications; Chapter 24. Digital Communications; Chapter 25. |

Information Theory and Coding; Chapter 26. Computer Communications Networks  
Chapter 27. Satellite and Space Communications  
Chapter 28. Discrete-Time Signal Processing; Chapter 29. Transmission Lines; Chapter 30. Waveguides and Resonators; Chapter 31. Scattering Matrices; Chapter 32. Antennas; Chapter 33. Electromagnetic-Wave Propagation; Chapter 34. Radio Noise and Interference; Chapter 35. Broadcasting, Cable Television, and Recording System Standards; Chapter 36. Radar; Chapter 37. Radio Navigation Systems; Chapter 38. Common Carrier Transmission; Chapter 39. Switching Networks and Traffic Concepts; Chapter 40. Electroacoustics; Chapter 41. Lasers  
Chapter 42. Computer Organization and Programming  
Chapter 43. Logic Design; Chapter 44. Probability and Statistics; Chapter 45. Reliability and Life Testing; Chapter 46. Cellular Telecommunications Systems; Chapter 47. Mathematical Equations; Chapter 48. Mathematical Tables; Chapter 49. Miscellaneous Data

---

Sommario/riassunto

Reference Data for Engineers is the most respected, reliable, and indispensable reference tool for technical professionals around the globe. Written by professionals for professionals, this book is a complete reference for engineers, covering a broad range of topics. It is the combined effort of 96 engineers, scientists, educators, and other recognized specialists in the fields of electronics, radio, computer, and communications technology. By providing an abundance of information on essential, need-to-know topics without heavy emphasis on complicated mathematics, Reference Data for Eng
