Sommario/riassunto	It is my pleasure to introduce you a collection of papers from the 10th International Scientific Conference European Financial Systems 2013, organized annually by the Department of Finance at the Faculty of Economics and Administration, Masaryk University. We can now say that our conference has a long history starting in 2003 in Brno, Czech Republic and thereafter continuing as an annual event. To celebrate our first anniversary the conference was organized at a very distinctive and special place – the city of Tel, a UNESCO World Heritage Site. This year&apos;s conference was focused on the current issues related to the financial crisis inthe European Union, specifically in financial markets, banking and insurance industries and corporate finance. Because the collection of papers presents the latest scientific knowledge in this area, I believe you will get a number of new insights useful for yours cientific enquires as well as your educational or practical activities.
