

1. Record Nr.	UNISALENT0991001972909707536
Autore	Bianchi Bandinelli, Ranuccio, 1900-1975
Titolo	L'arte dell'antichità classica : Etruria- Roma / Ranuccio Bianchi Bandinelli, Mario Torelli
Pubbl/distr/stampa	Torino : UTET università, 2006
ISBN	8860080533
Descrizione fisica	475 p. (alcune ripieg.) : ill. ; 28 cm.
Altri autori (Persone)	Torelli, Marioauthor
Soggetti	Arte etrusca Arte romana
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Contiene bibliografia: pp. 470-473

2. Record Nr.	UNINA9910815667203321
Autore	Zhang Daye <1854->
Titolo	The world of a tiny insect : a memoir of the Taiping rebellion and its aftermath / / by Zhang Daye ; translated, with an introduction, by Xiaofei Tian
Pubbl/distr/stampa	Seattle : , : University of Washington Press, , [2013] ©2013
ISBN	0-295-80491-2
Descrizione fisica	1 online resource (224 p.)
Classificazione	HIS008000BIO022000
Altri autori (Persone)	TianXiaofei <1971->
Disciplina	951/034092
Soggetti	HISTORY / Asia / China BIOGRAPHY & AUTOBIOGRAPHY / Women China History Taiping Rebellion, 1850-1864 Personal narratives China History 1861-1912 China Biography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

"From the cry of a tiny insect, one can hear the sound of a vast world. "So begins Zhang Daye's preface to *The World of a Tiny Insect*, his haunting memoir of war and its aftermath. In 1861, when China's devastating Taiping rebellion began, Zhang was seven years old. The Taiping rebel army occupied Shaoxing, his hometown, and for the next two years, he hid from Taiping soldiers, local bandits, and imperial troops and witnessed gruesome scenes of violence and death. He lost friends and family and nearly died himself from starvation, illness, and encounters with soldiers on rampages. Written thirty years later, *The World of a Tiny Insect* gives voice to this history. A rare premodern Chinese literary work depicting a child's perspective, Zhang's sophisticated text captures the macabre images, paranoia, and emotional excess that defined his wartime experience and echoed throughout his adult life. The structure, content, and imagery of *The World of a Tiny Insect* reveals a carefully crafted, fragmented narrative that skips in time and probes the relationships between trauma and memory, revealing both history and its psychic impact. Xiaofei Tian's annotated translation includes an introduction that situates *The World of a Tiny Insect* in Chinese history and literature and explores the relevance of the book to the workings of traumatic memory. Zhang Daye (b. 1854) is known only as the author of *The World of a Tiny Insect*. Xiaofei Tian is professor of Chinese literature at Harvard University. Among her recent publications is *Visionary Journeys: Travel Writings from Early Medieval and Nineteenth-Century China*. "The author and narrator recounts his terrible experiences and miraculous survivals with a child's curiosity and in a vivid, straightforward way. But he also embeds what happened to him in a larger historical, philosophical, moral, and aesthetic context. No comparable primary source available in English does anything like this for the Taiping Rebellion." --Judith Zeitlin, University of Chicago"--

3. Record Nr.	UNINA9910619142503321
Titolo	2010 Advanced Technologies for Enhancing Quality of Life
Pubbl/distr/stampa	[Place of publication not identified], : IEEE, 2010
ISBN	0-7695-4280-8
Disciplina	629.8/36
Soggetti	Adaptive control systems - Control systems Robots Robotics Biomechanics Mechanical Engineering Engineering & Applied Sciences Mechanical Engineering - General
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa

Autore	Sliwka Hans-Richard
Titolo	Carotenoids
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019
ISBN	3-03921-865-4
Descrizione fisica	1 online resource (168 p.)
Soggetti	Biology, life sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Carotenoids are a group of natural pigments, consisting of more than 750 compounds. They are mostly yellow, orange, or red in color, due to the system of conjugated double bonds. This structural element is also responsible for the good antioxidant properties of many carotenoids. Carotenoids have shown numerous biological activities (not only as provitamin A), e.g., preventive properties of fruits and vegetables. As lipophilic compounds, their uptake and storage in the body are dependent on various conditions. In vitro and in vivo data showed stimulating and inhibitory effects of matrix compounds on bioaccessibility and bioavailability of carotenoids.</p>

5. Record Nr.	UNINA9910367741703321
Autore	Sark Wilfried van
Titolo	PV System Design and Performance
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019
ISBN	3-03921-623-6
Descrizione fisica	1 online resource (360 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Photovoltaic solar energy technology (PV) has been developing rapidly in the past decades, leading to a multi-billion-dollar global market. It is of paramount importance that PV systems function properly, which requires the generation of expected energy both for small-scale systems that consist of a few solar modules and for very large-scale systems containing millions of modules. This book increases the understanding of the issues relevant to PV system design and correlated performance; moreover, it contains research from scholars across the globe in the fields of data analysis and data mapping for the optimal performance of PV systems, faults analysis, various causes for energy loss, and design and integration issues. The chapters in this book demonstrate the importance of designing and properly monitoring photovoltaic systems in the field in order to ensure continued good performance.</p>
