

1. Record Nr.	UNINA9910815714003321
Autore	Bucker Axel
Titolo	Deployment guide series : IBM Tivoli Security Compliance Manager / / Axel Buecker, Hendrik H. Fulda, Dieter Riexinger
Pubbl/distr/stampa	Austin, TX, : IBM International Technical Support Organization, 2005
Edizione	[1st ed.]
Descrizione fisica	xii, 196 p
Collana	Redbooks
Altri autori (Persone)	FuldaHendrik H RiexingerDieter
Disciplina	005.8
Soggetti	Electronic commerce - Security measures Business enterprises - Computer networks - Access control Computer networks - Access control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"August 2005." "This edition applies to Version 5, Release 1, Modification 0 of IBM Tivoli Security Compliance Manager (product number 5724-F82)."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover -- Contents -- Notices -- Trademarks -- Preface -- The team that wrote this redbook -- Become a published author -- Comments welcome -- Part 1 Architecture and design -- Chapter 1. Business context for security compliance management -- 1.1 Introduction to compliance management -- 1.2 Why compliance management? -- 1.3 Determining the how: influencing factors -- 1.4 General challenges -- 1.5 Conclusion -- Chapter 2. Tivoli Security Compliance Manager design and structure -- 2.1 Logical component architecture -- 2.1.1 Data collection components -- 2.1.2 Compliance evaluation components -- 2.1.3 Compliance report components -- 2.1.4 Security Compliance Manager server -- 2.1.5 Administration components -- 2.2 Physical component architecture -- 2.2.1 Communication port usage -- 2.2.2 Deployment on physical nodes -- 2.3 Security Compliance Manager walkthrough -- Chapter 3. Architecting a Security Compliance Management solution -- 3.1 Solution architectures, design, and methodologies -- 3.2 Design process -- 3.2.1 Typical context of Security Compliance Manager solutions -- 3.2.2 Phased project approach -- 3.2.3 Placing components in network zones -- 3.2.4 Deployment of Security

Compliance Manager clients -- 3.2.5 Delegated administration -- 3.2.6
Implementation of Security Compliance Manager policies -- 3.2.7
Integration with access control management systems -- 3.2.8
Integration with Tivoli Risk Manager -- 3.3 Business processes and
compliance management -- 3.3.1 A generic security compliance
management business process -- 3.3.2 Security Compliance Manager
business process support -- 3.3.3 Automated security compliance
management -- Part 2 Customer environment -- Chapter 4. Armando
Brothers Banking Corp. -- 4.1 Company profile -- 4.2 Current IT
architecture -- 4.2.1 Existing security infrastructure -- 4.2.2 Existing
middleware infrastructure.
4.3 Current security policies and standards -- 4.4 Emerging problems
-- 4.5 Strategic objectives -- 4.6 Critical success factors for strategy
implementation -- 4.7 Resulting business requirements -- 4.8
Requirements on project execution -- 4.9 ROI study and results --
Chapter 5. Security Compliance Manager design -- 5.1 Functional
requirements -- 5.1.1 Phase I: Establishing a baseline -- 5.1.2 Phase II:
Extend coverage -- 5.2 Design objectives -- 5.2.1 General and
infrastructure objectives -- 5.2.2 Platform specific security concepts --
5.3 Implementation architecture -- 5.3.1 Physical components -- 5.3.2
User roles and responsibilities -- 5.4 Project organization -- Chapter
6. Technical implementation -- 6.1 Deployment phase I -- 6.1.1
Planning and installing the server -- 6.1.2 DB2 maintenance tasks --
6.1.3 Deploying clients -- 6.1.4 Installing the reporting server -- 6.1.5
Configuring operational reports -- 6.2 Deployment phase II -- 6.2.1
Tivoli Access Manager integration -- 6.2.2 Tivoli Risk Manager
integration -- 6.2.3 Collector development -- 6.2.4 Report
development -- 6.3 Conclusion -- Part 3 Appendixes -- Appendix A.
Developing a custom collector -- Required method getReleaseNumber()
-- Required method getCompatibleOS() -- Required method
getDescription() -- Required method getParameters() -- Required
method getTables() -- Required method executeV2() -- Appendix B.
Introducing the Security Vulnerability Index -- So what is the IBM
Global Services Vulnerability Index? -- How does it work? -- Appendix
C. Additional material -- Locating the Web material -- Using the Web
material -- How to use the Web material -- Glossary -- Related
publications -- IBM Redbooks -- Other publications -- Online
resources -- How to get IBM Redbooks -- Help from IBM -- Index --
Back cover.
