Nota di contenuto	Assessing the evidence base on health, employability and the labour market : lessons for activation in the UK -- Disability benefits in an age of austerity -- From impairment to incapacity : educational inequalities in disabled people's ability to work -- "Keeping meself to meself" : how social networks can influence narratives of stigma and identity for long-term sickness benefits recipients -- Measuring the impacts of health conditions on work incapacity : evidence from the British Household Panel Survey -- The influence of presenting health condition on eventual return to work for individuals receiving health-related welfare benefits -- A review of health-related support provision within the UK work programme : what's on the menu? -- Supporting the UK's workless : an international comparative perspective.
Sommario/riassunto	Bringing together researchers from the fields of social policy, economics, sociology and clinical psychology, this book offers new evidence on the inter-related problems faced by disability claimants,

and identifies important lessons for policy. Explores how reducing the level of UK benefit claiming among those with health limitations has been a priority for successive governments Argues that current policy fails to reflect the evidence that people on long-term disability benefits face a complex combination of barriers to work and social inclusion Demonstrates that there is a need for conti
