Guidelines for developing and evaluating learning objectives for educational programmes in environmental health -- Annex 8. Participants in preparatory meetings, 1995-1996. |
| Sommario/riassunto      | A practical guide to the development of curricula for the education and training of environmental health professionals. Prepared in consultation with educational institutes in a number of countries, the guide   |

responds to both growing concern about environmental hazards and the need to ensure that professionals are adequately equipped with knowledge and skills. By recommending detailed model curricula for a range of professional categories, the book also aims to encourage the harmonization of int.
