1. Record Nr. UNINA9910815759403321

Titolo	Far-Field Wireless Power Transfer and Energy Harvesting / / edited by Naoki Shinohara and Jiafeng Zhou
Pubbl/distr/stampa	Norwood, MA : , : Artech House, , [2023] ©2023
ISBN	1-63081-913-1
Edizione	[First edition.]
Descrizione fisica	1 online resource (233 pages)
Disciplina	002
Soggetti	Energy harvesting Wireless power transmission
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Far-Field Wireless Power Transferand Energy Harvesting -- Contents -- Preface -- Chapter 1 General Introduction -- 1.1History of Wireless Power Transfer and Energy Harvesting -- 1.2Technical Introduction of WPT/Harvesting -- 1.2.1Rectennas for WPT/Harvesting -- 1.2.2Beamforming for WPT -- 1.3Current Status of Commercialization/Regulation/Research on WPT/Harvesting -- References -- Chapter 2 In-Room Wide-Beam WPT and Its Applications -- 2.1Overview of Wide-Beam WPT -- 2.2Approximation of Received Power -- 2.3Design of Receiving Antenna -- 2.4 Management of Received Power -- 2.5Application of Health Monitoring Sensor -- 2.6Application of Infrastructure Monitoring Sensor -- 2.7Distributed WPT -- 2.8Conclusion -- References -- Chapter 3 Radiative Wireless Power Transfer -- 3.1Introduction -- 3.2Transmitter -- 3.2.1Wireless Power Transmitter -- 3.2.2 PWSN: Passive Nodes -- 3.3Wireless Experimental Results -- 3.4 Discussion -- References -- Chapter 4 Wireless Power Transfer Enabled Wireless Communication -- 4.1Introduction -- 4.2WPT and Backscatter Channels -- 4.3Backscatter Communication Principle and Channel Model -- 4.3.1The Principle of Backscatter Communication -- 4.3.2Channel Coding in Backscatter Communication -- 4.3.3 Dyadic Backscatter Channel and MIMO Backscatter -- 4.4 Demodulation of Backscatter Signal -- 4.4.1Pulsewidth Measurement

Demodulation -- 4.4.2PSK Demodulation -- References -- Chapter 5 Medical Applications -- 5.1Introduction -- 5.2Planar Phase-Controlled Metasurface -- 5.2.1Conformal Metasurfaces for Wireless Power Transfer -- 5.2.2Wireless Power Transfer for Implantable Devices In Vivo -- 5.3Wireless Optogenetics -- 5.3.1Cavity Resonator Capable of Powering Ultrasmall Wireless Optogenetics -- 5.3.2Peripheral Nerves Stimulations.
5.4Introduction to Long-Range Wireless Communication Technology -- 5.5Conclusion -- References -- Chapter 6 Indoor/Outdoor-Beam WPT with Beamforming -- 6.1Indoor-Beam WPT -- 6.2Outdoor-Beam WPT -- 6.3Beam WPT in Space -- References -- Chapter 7 Solar Power Satellite -- 7.1Introduction -- 7.2History -- 7.3 Concepts -- 7.4Challenges -- 7.4.1Technical -- 7.4.2Economic -- 7.4.3Legal -- 7.4.4Schedule -- 7.5Conclusion -- References -- Chapter 8 Low-Power Integrated Circuit Design for Energy Harvesting -- 8.1Introduction -- 8.2RF Energy Harvesting System -- 8.3RF Rectifier -- 8.3.1Basic Topology of a Rectifier -- 8.3.2 Operating Principle -- 8.3.3Internal Resistance Modeling of Multistage Rectifier -- 8.4Design Challenge of Low-Power Active Rectifier IC -- 8.4.1Transit Frequency -- 8.4.2Structure of MOSFET Devices in n-Well Process -- 8.4.3Vdrop Comparison -- 8.4.4 Cross-Coupled Architecture of an Active Rectifier -- 8.4.5Multistage RF Active Rectifier -- 8.4.6Design and Optimization of Flying Capacitance -- 8.5Design Examples -- 8.5.1Example No. 1 -- 8.5.2Example No. 2 -- 8.5.3Example No.3 -- 8.6Conclusion -- References -- Chapter 9 Energy Harvesting for Smart Grid Application -- 9.1Self-Powered Wireless Sensors in Smart Grid -- 9.2Magnetic Field Energy Harvesting -- 9.2.1Cabled-Clamped Magnetic Field Energy Harvester -- 9.2.2Free-Standing Magnetic Field Energy Harvester -- 9.3Electric Field Energy Harvesting -- 9.4Conclusions -- References -- Chapter 10 Energy Harvesting from Low-Power Density Environments -- 10.1Introduction -- 10.2Wideband Antenna Design -- 10.3Wide Beamwidth Antenna Design -- 10.3.1 Potential Modes of a Metasurface -- 10.3.2Geometry of the Proposed Metasurface Antenna -- 10.3.3Rectifier Design -- 10.3.4 Measurement Result -- 10.4Conclusion -- References.
Chapter 11 Metamaterials and Metasurfaces for Wireless Energy Harvesting -- 11.1Introduction -- 11.2Design of Single-Mode Resonant Metasurfaces for Energy Harvesting -- 11.2.1Design of Ring-Shaped Wi-Fi Band Energy Harvester -- 11.2.2Complementary Split-Ring Resonator High-Frequency Wi-Fi Energy Harvester Design -- 11.3Design of Multimode Resonant Metasurfaces for Energy Harvesting -- 11.3.1Design of Energy Harvester with Nested Ring Structure -- 11.3.2Design of Butterfly-Type Metasurfaces for Three-Band Energy Harvester -- 11.4Design of Rectifying Metasurfaces -- 11.4.1Metasurfaces Element and Rectifier Design -- 11.4.2Array Design and Testing of RMS -- 11.5An Optically Transparent Metantenna for RF Wireless Energy Harvesting -- 11.5.1Design of Optically Transparent Metantenna -- 11.5.2Wireless Energy Harvesting Performance -- 11.6Summary and Conclusion -- References -- List of Acronyms -- About the Editors -- List of Contributors -- Index.
