

1. Record Nr.	UNINA9910815884903321
Autore	Mozersky Jessica
Titolo	Risky genes : genetics, breast cancer, and Jewish identity // Jessica Mozersky
Pubbl/distr/stampa	Abingdon, Oxon ; ; New York, NY : , : Routledge, , 2013
ISBN	1-136-24066-7 0-203-10257-6 1-283-89462-9 1-136-24067-5
Descrizione fisica	1 online resource (177 p.)
Collana	Genetics and society
Disciplina	616.99/449071
Soggetti	Breast - Cancer - Risk factors Cancer - Risk factors Jewish women - Health risk assessment Women - Health risk assessment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Setting the scene: Ashkenazi Jews and genetic disease -- The "Ashkenazi BRCA mutations" -- Re-thinking the consequences of medical genetic research -- On being Jewish -- History, memory and the BRCA genes -- Future generations -- Conclusion.
Sommario/riassunto	Ashkenazi Jews have the highest known population risk of carrying specific mutations in the high-risk breast cancer genes, BRCA1 and BRCA2. So what does it mean to be told you have an increased risk of genetic breast cancer because you are of Ashkenazi Jewish origin? In a time of ever-increasing knowledge about variations in genetic disease risk among different populations, there is a pressing need for research regarding the implications of such information for members of high-risk populations. Risky Genes provides first-hand intimate descriptions of women's experiences of b
