                        After Thoughts; References; Index

   Sommario/riassunto   This book explores why Africa has not managed to achieve sustainable,
                        self-regenerating development. The work situates problems in the
                        practices employed by national political elites, donors and lenders to

African development, and book offers a studied alternative that can positively change Africa's development direction - The Participatory Social Learning Approach.
