

1. Record Nr.	UNINA9910816075103321
Autore	Landau Susan Eva
Titolo	Surveillance or security? : the risks posed by new wiretapping technologies // Susan Landau
Pubbl/distr/stampa	Cambridge, Mass., : MIT Press, ©2010
ISBN	0-262-29491-5 1-299-28426-4 0-262-29558-X
Descrizione fisica	1 online resource (400 p.)
Disciplina	363.25/2
Soggetti	Telecommunication - Security measures - United States Wiretapping - United States Data encryption (Computer science) - Government policy - United States Electronic surveillance - Political aspects - United States Computer crimes - Risk assessment - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [339]-344) and index.
Sommario/riassunto	In this book, the author argues that in embarking on an unprecedented effort to build surveillance capabilities deeply into communications infrastructure, the U.S. government is opting for short-term security and creating dangerous long-term risks. Landau describes what makes communications security hard, warrantless wiretapping and the role of electronic surveillance in the war on terror, the economic threats posed by electronic spying, and the risks created by embedding wiretapping into communications networks. How can we get communications security right? Landau offers a set of principles to govern wiretap policy that will allow us to protect our national security as well as our freedom.
