Ferencz, Pharm.D., Ph.D., this unique new workbook enhances the learning experience in several ways. Learners can assess their skills and choose the progressive learning paths that fit their needs, starting with the chapters that match their abilities. \* Two pathways to learning: one covers basic concepts and skills for calculations and compounding; the other is advanced, with a progress test to measure aptitude. \* Focus is on how to go about solving mathematical problems. \* Problems presented in step-by-step phases, breaking complicated calculations into manageable stages for easier analysis. \* Easy-to-follow outline format with statement of goals, key terms, worked problems, and solutions. \* Additional review problems and solutions in the appendix. \* Calculations problems tied to all areas and aspects of pharmaceutical practice.
