Sommario/riassunto

This book seeks to critically examine African Americans in higher education with an emphasis on social and philosophical foundations of Africana culture. This is a critical interdisciplinary study, which examines the collection, interpretation, and analysis of quantitative and qualitative data in the field of higher education. To date, there are not any single-authored or edited collections that attempt to research the logical and conceptual ideas of the disciplinary matrix of Africana social and philosophical foundations of African Americans in higher education. Therefore, this volume provides readers with a compilation of literary, historical, philosophical, and communicative essays that describe and evaluate the Black experience from an Afrocentric perspective for the first time. It is required reading in a wide range of African American Studies courses.
