

1. Record Nr.	UNINA9910816156903321
Titolo	Advanced materials for wastewater treatment // edited by Shahid-ul-Islam
Pubbl/distr/stampa	Beverly, MA : , : Scrivener Publishing : , : Wiley, , 2017
ISBN	1-119-40779-6 1-119-40778-8 1-119-40780-X
Descrizione fisica	1 online resource (514 pages) : illustrations (some color)
Collana	Advanced materials series
Disciplina	628.3
Soggetti	Sewage - Purification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Title page -- Copyright page -- Preface -- Chapter 1: Arsenic: Toxic Effects and Remediation -- 1.1 Introduction -- 1.2 Arsenic Concentration in Water -- 1.3 Exposure of Arsenic in Human Body -- 1.4 Metabolism and Excretion of Arsenious Compounds -- 1.5 Arsenic Toxicity and Mechanism -- 1.6 Detoxification of Arsenic -- 1.7 Arsenic Remediation Technologies -- 1.8 Adsorption and Recent Advancement -- 1.9 Conclusion -- Acknowledgment -- Abbreviations -- References -- Chapter 2: Recent Trends in Textile Effluent Treatments: A Review -- 2.1 Introduction -- 2.2 Industrial Dyes, Dying Practices, and Associated Problems -- 2.3 Wastewater Remediation -- 2.4 Physical Methods -- 2.5 Chemical Methods -- 2.6 Bioremediation -- 2.7 Products Recognition and Mechanisms of Dye Degradation -- 2.8 Conclusion -- 2.9 Future Outlook -- References -- Chapter 3: Polyaniline as an Inceptive Dye Adsorbent from Effluent -- 3.1 Introduction -- 3.2 Pollution Due to Dyes -- 3.3 Methods Used for the Dye Removal -- 3.4 Adsorption Kinetics -- 3.5 Polyaniline: An Emerging Adsorbent -- 3.6 Conclusion -- References -- Chapter 4: Immobilized Microbial Biosorbents for Wastewater Remediation -- 4.1 Introduction -- 4.2 Immobilized Microbial Biosorbent -- 4.3 Biosorption Mechanism -- 4.4 Conclusion -- References -- Chapter 5: Remediation of Cr (VI) Using Clay Minerals, Biomasses and Industrial Wastes as Adsorbents -- 5.1 Introduction -- 5.2 Isotherm Models --

5.3 Thermodynamics of Adsorption -- 5.4 Kinetics of Adsorption --
5.5 Solution pH -- 5.6 Clay Minerals -- 5.7 Biomasses -- 5.8 Industrial
Wastes -- 5.9 Conclusion -- References -- Chapter 6: Microbial
Diversity as a Tool for Wastewater Treatment -- 6.1 Overview of
Wastewater -- Sources, Pollutants, and Characteristics -- 6.2 Role of
Dominant Wastewater Treatment Communities in Biodegradation.
6.3 Methods for the Treatment of Wastewater -- 6.4 Conclusion --
References -- Chapter 7: Role of Plant Species in Bioremediation of
Heavy Metals from Polluted Areas and Wastewaters -- 7.1 Introduction
-- 7.2 Heavy Metals (HM) Worldwide -- 7.3 Allochthonous and
Autochthonous Plants -- 7.4 Phytoremediation of Heavy Metals (HM) --
7.5 Methodology -- 7.6 Analysis of Research on Heavy Metals (HM) and
Native and Endemic Plant Species -- 7.7 Results -- 7.8 Conclusion --
References -- Chapter 8: Bioremediation: A Green, Sustainable and
Eco-Friendly Technique for the Remediation of Pollutants -- 8.1
Introduction -- 8.2 Immobilization -- 8.3 Enzyme Immobilization
Strategies -- 8.4 Adsorption -- 8.5 Entrapment -- 8.6 Encapsulation
-- 8.7 Covalent Binding -- 8.8 Self-Immobilization -- 8.9 Properties of
Immobilized Enzymes -- 8.10 Enzymes Sources -- 8.11 Conditions for
Lipid Degradation -- 8.12 Environmental Applications of Ligninolytic
Enzymes -- 8.13 Conclusions -- References -- Chapter 9: Role of
Plant-Based Biochar in Pollutant Removal: An Overview -- 9.1
Introduction -- 9.2 Preparation Methods of Biochar -- 9.3 Physico-
chemical Characterization of Plant-Based Biochar -- 9.4 Biochar for
Heavy Metal Removal -- 9.5 Biochar for Dye Removal -- 9.6 Biochar for
Fluoride Removal -- 9.7 Biochar for Persistent Organic Pollutant
Removal -- 9.8 Biochar for Other Pollutant Removal -- 9.9 Biochar for
Soil Treatment/Improvement -- 9.10 Conclusion -- Acknowledgments
-- References -- Chapter 10: A Review on Ferrate(VI) and
Photocatalysis as Oxidation Processes for the Removal of Organic
Pollutants in Water and Wastewater -- 10.1 Introduction -- 10.2
Ferrate(VI) -- 10.3 Photocatalysis -- 10.4 Combination of
Photocatalysis (UV/TiO₂) and Ferrate(VI) -- 10.5 Conclusions --
References -- Chapter 11: Agro-Industrial Wastes Composites as Novel
Adsorbents -- 11.1 Introduction.
11.2 Material and Methods -- 11.3 Results and Discussion -- 11.4
Conclusion -- References -- Chapter 12: A Review on the Removal of
Nitrate from Water by Adsorption on Organic-Inorganic Hybrid
Biocomposites -- 12.1 Introduction -- 12.2 Adsorbents for the
Removal of Nitrate from Water -- 12.3 Models for Adsorption Process
-- 12.4 Column Study -- 12.5 Conclusion -- Nomenclatures --
References -- Chapter 13: Nitrate Removal and Nitrogen Sequestration
from Polluted Waters Using Zero-Valent Iron Nanoparticles Synthesized
under Ultrasonic Irradiation -- 13.1 Introduction -- 13.2 Materials and
Methods -- 13.3 Results and Discussion -- 13.4 Conclusion --
Acknowledgments -- References -- Index -- End User License
Agreement.
