The watershed -- Land of coal and steel -- The resourceful state -- Imperial valley -- Planet of limits. Plunder and plenty -- The wolf at the door -- Earth's boundaries -- Athabasca River -- Epilogue: life on a pale blue dot.
Sommario/riassunto	"The discovery of the Americas around 1500 AD was an extraordinary watershed in human experience. It gave rise to the modern period of human ecology, a phenomenon global in scope that set in motion profound changes in almost every society on earth. This new period, which saw the depletion of the lands of the New World, proved tragic for some, triumphant for others, and powerfully affecting for all."-- Provided by publisher.
