

1. Record Nr.	UNINA9910816202903321
Titolo	Electrochemical dictionary // Allen J. Bard, Gyorgy Inzelt, Fritz Scholz (Eds.)
Pubbl/distr/stampa	Berlin, : Springer, 2008
ISBN	1-281-49163-2 9786611491635 9783340745983 3-540-74598-X
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (734 p.)
Altri autori (Persone)	BardAllen J InzeltGyorgy ScholzF (Fritz)
Disciplina	541.3703
Soggetti	Electrochemistry Electrical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Solo disponibile en formato electrónico Description based upon print version of record.
Nota di contenuto	A -- B -- C -- D -- E -- F -- G -- H -- I -- J -- K -- L -- M -- N -- O -- P -- Q -- R -- S -- T -- U -- V -- W -- X -- Y -- Z.
Sommario/riassunto	The Electrochemical Dictionary provides up-to-date, broad and authoritative coverage of the specific terms most used in electrochemistry and its related fields, including relevant areas of physics and engineering. This modern compendium will be an indispensable source of information for scientists, engineers, and technical staff active in all fields of electrochemistry. The more than 2.770 entries have been written by a distinguished panel of eminent electrochemists. Each entry supplies a clear and precise explanation of the term and provides references to the most useful reviews, books and original papers to enable readers to pursue a deeper understanding if so desired. The Electrochemical Dictionary will also be appreciatively consulted by scientists working in adjacent sciences and technologies, who need a quick understanding of the electrochemical terms they encounter. More than 300 figures and illustrations elaborate the textual

definitions. The Electrochemical Dictionary also contains biographical entries of people who have substantially contributed to electrochemistry.
