Gender-based equal opportunity in UK small and medium enterprises; Bookshelf
Sommario/riassunto	A selection of papers from the European Academy of Management Conference 2004 - from the Gender and management track. There are four papers from all over Europe which report on recent empirical research. The issue overall provides some new perspectives, in particular it shows how the position of women in management demonstrates both real similarities and also key differences between countries and regions and between different research approaches.
