

1. Record Nr.	UNINA9910816230703321
Titolo	Low temperature plasma technology : methods and applications // edited by Paul K. Chu, XinPei Lu
Pubbl/distr/stampa	Boca Raton : , : CRC Press, , 2014
ISBN	0-429-19397-1 1-4665-0991-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (488 p.)
Classificazione	SCI013050SCI055000TEC021000
Altri autori (Persone)	ChuPaul K
Disciplina	621.044 621.5/6 621.56
Soggetti	Low temperature plasmas Low temperature plasmas - Industrial applications Low temperature plasmas - Scientific applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	section 1. Fundamentals -- section 2. Processing and characterization -- section 3. Applications.
Sommario/riassunto	This book provides a comprehensive overview of low temperature plasma generation, experimental methods, diagnostics, and novel applications. The first section describes basic principles of low temperature plasma physics. The second section discusses simulations of low temperature plasmas, the two main streams to generate atmospheric pressure non-equilibrium plasmas (microdischarge and nanosecond pulse discharge) and plasma diagnostics methods. The last section deals with the broad range of applications, from synthesis of nanomaterials and environmental applications to treatment of biomaterials and plasma medicine--
