

1. Record Nr.	UNINA9910816346503321
Autore	Turner David A
Titolo	Using the medical model in education : can pills make you clever? // David A. Turner
Pubbl/distr/stampa	London ; ; New York, : Continuum, c2010
ISBN	1-282-45310-6 9786612453106 1-4411-9384-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (190 p.)
Disciplina	615.78 615/.78
Soggetti	Nootropic agents Education Intellect Neuropsychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [178]-180) and index.
Nota di contenuto	Contents; Chapter 1: Medical Models in Education; Chapter 2: The Physical Basis of Intelligence; Chapter 3: The Thinking Machine: What is 'Hard-wired' in the Brain?; Chapter 4: What is Intelligence?; Chapter 5: Thinking Harder or Thinking Smarter?; Chapter 6: Attention Deficit; Chapter 7: Hyperactivity Disorder - Or Just Having Something Better to Do?; Chapter 8: Two Different Approaches to Learning; Chapter 9: Discipline and Respect; Chapter 10: Whither Education?; Chapter 11: Conclusions; References; Index
Sommario/riassunto	Medicine, and particularly neuroscience, appears to offer the kind of educational quick fixes that politicians and the public would love to have. Following media reports of drugs that seemingly improve learning and memory, David Turner examines commonly held beliefs about learning, knowledge and intelligence, and critically assesses such claims. Using the Medical Model in Education then moves beyond the immediate, fashionable or any specific substance, to a deeper examination of what society does or should expect in terms of results, from the educational system. Many of the underlying problems
