Sommario/riassunto

Sustainable tourism is not a static target, but a dynamic process of change, a transition. This book considers how monitoring using indicators can assist tourism to make such a sustainability transition. It encourages the reader to view tourism from a broad, interdisciplinary perspective and draws on material from a wide range of sources including ecology, global change and the new and emerging field of sustainability science. The book explains why monitoring is important for different groups of stakeholders; public and private sector, NGOs and communities. It also examines important monitorin
