

1. Record Nr.	UNINA9910816531603321
Autore	Kulichenko Natalia
Titolo	Concentrating solar power in developing countries : : regulatory and financial incentives for scaling up / / Natalia Kulichenko, Jens Wirth
Pubbl/distr/stampa	Washington, DC : , : World Bank, , 2012
ISBN	1-280-88194-1 9786613723253 0-8213-9608-0
Edizione	[1st ed.]
Descrizione fisica	pages cm
Collana	World Bank Studies
Altri autori (Persone)	WirthJens
Disciplina	333.792/3091724
Soggetti	Energy development - Developing countries Solar energy - Developing countries Renewable energy sources - Developing countries Energy industries - Developing countries - Finance
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Introduction and technology brief -- pt. 2. Financial and regulatory schemes : the current situation -- pt. 3. Financing CST : how to bring technology costs down.
Sommario/riassunto	At present, different concentrating solar thermal technologies (CST) have reached varying degrees of commercial availability. This emerging nature of CST means that there are market and technical impediments to accelerating its acceptance, including cost competitiveness, an understanding of technology capability and limitations, intermittency, and benefits of electricity storage. Many developed and some developing countries are currently working to address these barriers in order to scale up CST-based power generation. Given the considerable growth of CST development in several World Bank Group
