

1. Record Nr.	UNINA9910816561403321
Autore	Klingberg Torkel <1967->
Titolo	The overflowing brain [[electronic resource] ] : information overload and the limits of working memory // Torkel Klingberg ; translated by Neil Betteridge
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2009
ISBN	0-19-770897-8 0-19-988825-6 1-281-82601-4 9786611826017 0-19-970672-7
Descrizione fisica	1 online resource (217 p.)
Disciplina	153
Soggetti	Human information processing - Physiological aspects Short-term memory - Physiological aspects Attention - Physiological aspects Cerebral cortex - Growth Neuroplasticity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 171-196) and index.
Nota di contenuto	Contents; 1. Introduction: The Stone Age Brain Meets the Information Flood; 2. The Information Portal; 3. The Mental Workbench; 4. Models of Working Memory; 5. The Brain and the Magical Number Seven; 6. Simultaneous Capacity and Mental Bandwidth; 7. Wallace's Paradox; 8. Brain Plasticity; 9. Does ADHD Exist?; 10. A Cognitive Gym; 11. The Everyday Exercising of Our Mental Muscles; 12. Computer Games; 13. The Flynn Effect; 14. Neurocognitive Enhancement; 15. The Information Flood and Flow; Notes and References; Index
Sommario/riassunto	As the pace of technological change accelerates, we are increasingly experiencing a state of information overload. Statistics show that we are interrupted every three minutes during the course of the work day. Multitasking between email, cell-phone, text messages, and four or five websites while listening to an iPod forces the brain to process more

and more informaton at greater and greater speeds. And yet the human brain has hardly changed in the last 40,000 years. Are all these high-tech advan
