Sommario/riassunto

For more than a century, from about 1600 until the early eighteenth century, the Dutch dominated world trade. Via the Netherlands the far reaches of the world, both in the Atlantic and in the East, were connected. Dutch ships carried goods, but they also opened up opportunities for the exchange of knowledge. The commercial networks of the Dutch trading companies provided an infrastructure which was accessible to people with a scholarly interest in the exotic world. The present collection of essays brings together a number of studies about knowledge construction that depended on the Dutch trading networks. Contributors include: Paul Arblaster, Hans den Besten, Frans Blom, Britt Dams, Adrien Delmas, Alette Fleischer, Antje Flüchter, Michiel van Groesen, Henk de Groot, Julie Berger Hochstrasser, Grégoire Holtz, Siegfried Huigen, Elspeth Jajdelska, Maria-Theresia Leuker, Edwin van Meerkerk, Bruno Naarden, and Christina Skott.
