

1. Record Nr.	UNINA9910816686403321
Titolo	Chemical ecology of insect parasitoids / / edited by Eric Wajnberg and Stefano Colazza
Pubbl/distr/stampa	Chichester, West Sussex, U.K., : John Wiley & Sons Inc., 2013
ISBN	9781118409589 1118409582 9781118409602 1118409604 9781299385962 1299385966 9781118409657 1118409655
Edizione	[1st ed.]
Descrizione fisica	1 online resource (330 p.)
Altri autori (Persone)	WajnbergE ColazzaStefano
Disciplina	632/.7
Soggetti	Semiochemicals Plant chemical ecology Parasitoids Plant parasites Insect-plant relationships
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Basic concepts -- pt. 2. Applied concepts.
Sommario/riassunto	Insect parasitoids are a fascinating group of animals in many respects. Perhaps the most fascinating point is that these insects, in the course of the evolutionary time, have developed an impressive way to use chemical compounds to dialogue with the different protagonists of their environment (i.e., conspecifics, their hosts and the plants on which their hosts are living). Unravelling the evolutionary meaning of such chemical communication networks can give new insights into the ecology of these insects and especially on how to improve their use for the control of noxious pests in bi
