| Sommario/riassunto      | This book presents the initial findings that framed early discussions on Internet public policy and outlines proposals that should guide policymaking in the future. In addition, Cronin, McLure, and Radin's viewpoints show that the future of e-commerce has as much to do with how policy issues are resolved as with how technological challenges are overcome.                                   |

American public affairs officers have met serious challenges in the past, but Arab public criticism of the United States has reached unprecedented levels since September 11, 2001. Polls show that much of the negative opinion of   |

the United States, especially in the Middle East, can be traced to dissatisfaction with U.S. foreign policy. Rugh, a retired career Foreign Service officer who twice served as ambassador to countries i
