Sommario/riassunto

Long before it became fashionable to talk of climate change, drought and water shortages, the authors of this lucid and trenchant dialogue were warning that planet earth was heading for uninhabitability. Exchanging viewpoints and insights that have matured over many years of thought, study and reflection, the discussants address a number of critical questions under three broad headings: man and nature, man and man, and the human revolution. One of the authors is a Westerner - a man of many parts, both wartime resistance fighter and leading industrialist, who founded one of the first organisati
