Sommario/riassunto	The Inter-State Application under the European Convention on Human Rights provides the first comprehensive monograph about the State-to-State human rights enforcement mechanism. The functions of the mechanism include also dispute settlement aspects, which are related to the compulsory jurisdiction of the Strasbourg Court. The study provides a full account of the development of the Inter-State

Application under Article 33 ECHR and puts its case law in the relevant historical and institutional context. The analysis concludes with detailed reform considerations which are situated within the discussion about the role of the European Court of Human Rights. The focus lies on the possibility to address and improve systemic human rights deficits beyond the single case. The Court's growing inter-State docket evidences the need for legal certainty.
