Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Half-title; Title; Copyright; Dedication; Contents; Preface; Glossary; 1 Looking ahead; Part I Speech and language problems; Part II Learning problems; Part III Behavior problems; Index
Sommario/riassunto	More than half the numbers of children with epilepsy have interrelated language, learning and/or behavior complications. By adulthood, these problems can interfere with socialization and employment. The seizures may be controlled but the developmental distortions can continue to present problems for health and education systems and carers. In this comprehensive and fully referenced book, William Svoboda distils a lifetime of clinical experience with childhood epilepsy

into three areas which address each of the main areas of difficulty. In each he looks at why the problems arise and assesses diagnostic and remediative approaches. The focus is on the whole care of the child rather than on diagnosis, classification and medication alone. Clinicians, mental health practitioners, educators and speech-language pathologists will find this book invaluable.
