The policy paradox; 7. The agrarian question; 8. The gender issue; 9. The ethnic factor; 10. The external dimension; 11. What we know and how; 12. Quo vadis Africa? |
| Sommario/riassunto | This revised and expanded second edition of African Politics in Comparative Perspective reviews fifty years of research on politics in Africa and addresses some issues in a new light, keeping in mind the changes in Africa since the first edition was written in 2004. The book synthesizes insights from different scholarly approaches and offers an original interpretation of the knowledge accumulated in the field. Goran Hyden discusses how research on African politics relates to the study of |

politics in other regions and mainstream theories in comparative politics. He focuses on such key issues as why politics trumps economics, rule is personal, state is weak and policies are made with a communal rather than an individual lens. The book also discusses why in the light of these conditions agriculture is problematic, gender contested, ethnicity manipulated and relations with Western powers a matter of defiance.

Sommario/riassunto The most comprehensive resource to date on the methods of empowerment with lesbian and gay clients, this book explores the

history and politics of gay identity and explains the basis and development of the empowerment approach in social work practice in the United States. After analyzing the different types of homophobia (individual, institutional, and internalized) and how these are manifested in real life situations, Tully addresses the special needs and issues particular to three age groups: gay and lesbian youth, adults, and older clients. The author offers practical applications for the social worker and client at the micro-, mezzo-, and macro-levels, from helping a teenage client to discover a personal sexual orientation (micro), to organizing a social event for lesbians and gays (mezzo), to building a community coalition (macro). Eye-opening case studies are provided for each age group and cover everything from defining problems, identifying the underlying issues causing them, understanding the role of homophobia, and the application of the empowerment perspective.
