

1. Record Nr.	UNINA9910817059603321
Titolo	Contaminated marine sediments : assessment and remediation // Committee on Contaminated Marine Sediments, Marine Board, Commission on Engineering and Technical Systems, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1989
ISBN	1-280-21432-5 9786610214327 0-309-55974-X 0-585-14409-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xi, 493 pages) : illustrations, maps
Altri autori (Persone)	Kamlet Kenneth S
Soggetti	Marine sediments - Sampling Marine sediments - Analysis Marine pollution - Measurement Sedimentation and deposition Waste disposal in the ocean
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Committee chairman: Kenneth S. Kamlet.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contaminated Marine Sediments -- Assessment and Remediation -- Copyright -- PREFACE -- ACKNOWLEDGEMENTS -- Contents -- EXECUTIVE SUMMARY -- FINDINGS AND RECOMMENDATIONS -- EXTENT OF CONTAMINATION -- Findings -- Recommendations -- Search for Contaminated Sites -- Utilization of Federal, Regional, and Local Expertise -- Coordination of Efforts -- CLASSIFICATION METHODOLOGIES -- Findings -- Recommendations -- Improved Methodologies -- Tiered Testing -- RISKS TO HUMAN HEALTH AND THE ECOSYSTEM -- Findings -- Recommendations -- Assessment of Risk Due to Contamination -- MOBILIZATION AND RESUSPENSION OF CONTAMINANTS -- Findings -- Recommendations -- Contaminant Transport and Partitioning -- Research in Sediment Transport -- Tiered Response Strategy -- CONTAMINATED SEDIMENT MANAGEMENT STRATEGIES -- Findings -- Recommendations -- Dredged Material

Management Strategy -- No Action -- REMEDIAL TECHNOLOGIES -- Findings -- Recommendations -- Source Control -- Technology and Information Transfer -- Remediation and Navigational Dredging -- Remedial Technologies -- Use of Capping -- Well-Focused Monitoring -- REMEDIATION AND SOURCE CONTROL: ECONOMIC CONSIDERATIONS -- Findings -- Recommendations -- Use of Benefit-Cost Comparisons -- Cost-Effectiveness Analysis -- Degree of Remediation -- Economic and Environmental Considerations -- Infeasible Remedial Options -- WORKSHOP SUMMARIES -- WORK GROUP I EXTENT, CLASSIFICATION, AND SIGNIFICANCE OF CONTAMINATION -- Extent of Contamination -- Classification of Contamination -- Significance of Contamination -- Resuspension of Sediments -- WORK GROUP II ASSESSMENT AND SELECTION OF REMEDIAL TECHNOLOGIES -- Selection of Remedial Alternatives -- Developments in Equipment for Removal of Contaminated Sediments -- Available Disposal Alternatives -- Economic Considerations -- International Joint Commission Areas of Concern.

CASE STUDIES -- EXTENT OF CONTAMINATION -- NATIONAL PERSPECTIVE ON SEDIMENT QUALITY -- Abstract -- Sediment Quality Assessment and Regulation -- The Data Base -- Freshwater Data -- Marine/Estuarine Data -- Observations and Conclusions -- Fresh Water -- Marine/Estuarine Waters -- Acknowledgment -- NATIONAL STATUS AND TRENDS PROGRAM FOR MARINE ENVIRONMENTAL QUALITY ASPECTS DEALING WITH CONTAMINATION IN SEDIMENTS -- Abstract -- Introduction -- National Status and Trends Monitoring of Sediment Properties -- Site Locations -- Field and Analytical Methods -- Results -- References -- CLASSIFICATION OF CONTAMINATED SEDIMENTS -- USE OF THE APPARENT EFFECTS THRESHOLD APPROACH (AET) IN CLASSIFYING CONTAMINATED SEDIMENTS -- Abstract -- Introduction -- Description of AET Approach -- Interpretation of AET -- Generation of Puget Sound AET -- Results of Validation Tests -- Measures of Reliability -- Test of AET Predictions -- Application of AET to Sediment Management in Puget Sound -- Conclusions and Research Recommendations -- References -- THE USE OF THE SEDIMENT QUALITY TRIAD IN CLASSIFICATION OF SEDIMENT CONTAMINATION -- Abstract -- Description of the Methodology -- Effectiveness and Relevance of The Methodology -- Field Validation of the Methodology -- Required Expertise and Costs -- Case Studies -- San Francisco Bay -- Puget Sound -- Conclusions and Recommendations -- References -- A REVIEW OF THE DATA SUPPORTING THE EQUILIBRIUM PARTITIONING APPROACH TO ESTABLISHING SEDIMENT QUALITY CRITERIA -- Bioavailability and Pore Water Concentration -- Partitioning of Chemicals -- Organic Carbon Normalization -- Equilibrium Partitioning Approach to Sediment Criteria -- Theoretical Speculations -- Sediment Quality Criteria for Metals -- Application to Marine Sediments -- Acknowledgments -- References -- MARINE SEDIMENT TOXICITY TESTS -- Abstract -- Introduction. Sediment Toxicity Tests-a Summary Review -- Effectiveness of Sediment Toxicity Tests -- Applications of Sediment Toxicity Tests -- Conclusions and Research Recommendations -- Acknowledgments -- References -- SIGNIFICANCE OF CONTAMINATION -- EFFECTS OF CONTAMINATED SEDIMENTS ON MARINE BENTHIC BIOTA AND COMMUNITIES -- Abstract -- Introduction -- Extent of Contamination -- Sediments -- Tissues -- Significance of Contamination to The Benthos Background -- Individual Responses -- Biochemical -- Genetic -- Pathologies -- Physiology -- Behavior -- Growth and Reproduction -- Survival -- Population and Community Level Responses -- The Successional Paradigm -- Population and Community Responses to

Contamination -- Implications of Changes in Community Structure --
Conclusions and Recommendations -- Acknowledgments --
References -- SEDIMENT CONTAMINATION AND MARINE ECOSYSTEMS:
POTENTIAL RISKS TO HUMAN HEALTH -- Abstract -- Transfer of Toxic
Chemicals to Human Populations -- The Human Health Implications --
Filling the Gaps in Knowledge -- References -- MOBILIZATION AND
RESUSPENSION -- PREDICTING THE DISPERSION AND FATE OF
CONTAMINATED MARINE SEDIMENTS -- Abstract -- Introduction --
Sediment Dispersion Processes -- Advection -- Turbulent Mixing --
Flocculation and Settling -- Erosion/Resuspension and Deposition --
Conclusions and Recommendations -- Acknowledgements --
References -- COMPUTER SIMULATION OF DDT DISTRIBUTION IN PALOS
VERDES SHELF SEDIMENTS -- Abstract -- Introduction -- Methods --
Deposition Model (Order 1) -- Mixing Model (Order 2) -- Sediment
Quality Projection -- Results -- Deposition Model -- Mixing Model --
Model Predictions -- Discussion -- Sensitivity -- Insight and
Limitations -- Extensions -- Summary and Conclusions --
Acknowledgments -- References -- Appendix Modeling Approach for
Sedimentation and Sedimentation/Mixing Models -- Notation.
ASSESSMENT AND SELECTION OF REMEDIAL TECHNOLOGIES --
MANAGEMENT STRATEGIES FOR DISPOSAL OF CONTAMINATED
SEDIMENTS -- Abstract -- Background -- Scope -- Management
Strategy -- Potential Problems and Testing Protocols -- Water Column
-- Benthic -- Effluent Quality -- Surface Runoff Quality -- Leachate
Quality -- Plant Uptake -- Animal Uptake -- Other Impacts -- Selection
of a Disposal Alternative -- Open-Water Disposal -- Confined Disposal
-- Open-Water Disposal With Restrictions -- Submerged Discharge --
Subaqueous Confinement -- Capping -- Chemical/Physical/Biological
Treatment -- Confined Disposal With Restrictions -- Site Selection And
Design -- Effluent Controls -- Runoff Controls -- Leachate Controls --
Control of Contaminant Uptake -- Other Controls -- Decision-Making
Framework -- Responsibility for Local Authority Decisions -- Evaluation
of Respective Contaminant Pathways -- Implementation -- Coe Policy
-- Applications -- Refinement -- References -- ALTERNATIVES FOR
CONTROL/TREATMENT OF CONTAMINATED DREDGED MATERIAL --
Abstract -- Background -- Contaminant Control During Dredging
Operations -- Dredge Selection -- Equipment and Operational Controls
-- Hopper Dredge Operation -- Cutterhead and Suction Dredge
Operation -- Dust Pan Dredges -- Special Purpose Dredges --
Clamshell Bucket Dredge Operations -- Additional Control Techniques
-- Contaminant Control During Transport -- Controls for Pipeline
Transport -- Controls for Scow/Barge Transport -- Controls for
Truck/Rail Transport -- Contaminant Control During Upland/Nearshore
Disposal Operations -- Site Control Strategies -- Site Selection --
Covers -- Surface-Water Controls -- Groundwater Controls -- Liners
-- Groundwater Recovery -- Leachate Collection -- Dewatering -- Site
Security -- Treatment of Dredged Material Slurries -- Solids Separation
and Classification Processes.
Solidification/Stabilization -- Thermal Destruction Processes --
Treatment of Dredged Material Solids -- Treatment of Site Waters --
Reuse of Contaminated Dredged Material -- Contaminant
Control/Treatment for Restricted Open-Water Disposal -- Site
Characteristics as a Control Technology -- Engineered Control
Technologies -- Submerged Discharge -- Lateral Confinement at The
Site -- Capping -- Dredged Material Treatment and Open-Water
Disposal -- Summary -- Acknowledgments -- References --
DEVELOPMENTS IN EQUIPMENT DESIGNED FOR HANDLING
CONTAMINATED SEDIMENTS -- Abstract -- Introduction -- Mechanical

Dredges -- Enclosed Clamshell -- Mechanical Hydraulic Dredges --
Mud Cat -- Remotely Controlled Mud Cat -- Clean-Up System --
Hydraulic Suction Dredges -- Refresher -- General Specifications --
Waterless Dredge -- Matchbox Dredge -- Wide Sweeper Cutterless
Dredge -- Pneumatic Dredges -- Pneuma Pump -- Oozer Dredge --
Resuspension Levels of Sediment for Special Purpose Dredges --
Summary -- Acknowledgments -- References -- MONITORING THE
EFFECTIVENESS OF CAPPING FOR ISOLATING CONTAMINATED
SEDIMENTS -- Abstract -- Introduction -- History of Capping
Operations -- Damos Monitoring Program -- Recent Capping
Observations -- Experimental Mud Dump Site (EMD) -- Foul Area
Disposal Site (FADS) -- Summary -- References -- List of Damos
Contributions Submitted To New England Division U.S. Army Corps Of
Engineers -- REMEDIAL TECHNOLOGIES USED AT INTERNATIONAL JOINT
COMMISSION AREAS OF CONCERN -- Abstract -- Background --
Remedial Options -- Commonly Used Techniques -- Remedial Options
Requiring Some Testing and Assessment -- Remedial Options Proposed
and Tested on A Limited Scale -- Some Limitations and Remedial
Options Requiring More Testing -- Baseline Mapping -- Observations
-- Conclusions and Research Recommendations.
ECONOMIC CONSIDERATIONS OF MANAGING CONTAMINATED MARINE
SEDIMENTS.
